

Custom Hurricane Products

Don't settle for a window view when you can get a wall view!

Designed for the restaurant industry this wall can provide a barrier from wind and cold without diminishing the view. It can allow a restaurant to expand its seating to the outdoors providing both view and wind protection. Because the wall is temporary you may be able to provide an outside smoking area.(See Local, State, and Federal regulation for requirements and restrictions)

Home owners can transform a lanai or porch into a "Florida Room" during the winter and back to its original state in the summer quickly.

Manufacturers can piggy back their overhead doors. This will provide daylight in the winter while blocking the cold wind from entering.

The Retractable Clear Wall stores in a 8" Box (Up to 102") either by crank or motor. The clear wall is thermally welded into 50" sections. Our wall is a 30 mil marine vinyl material. Our "flat lay retention system" eliminates skipping common to other end retention devices that creates uneven deployment.

3 years Full Replacement Limited Warranty (does not include clarity)
